PART I:

- The requester shall describe and justify what work they believe needs to be performed energized.
- The requester shall sign and print his/her title and date the request.

PART II:

- The electrically qualified person assigned to perform the work shall review the request and evaluate if it is necessary to perform work under energized conditions.
- If the electrically qualified person concurs that it is necessary to work energized, he/she will then establish the PPE Category (1, 2, 3, 4), the Minimum Approach Safe Distance and establish the technical requirements in Section II to perform the work with proper precautions.
- If a written procedure is needed for the operation, the supervisor or qualified person will write the procedure (in consultation with the FM Engineering Services Electrical Engineer and the Environmental Health and Safety Office (EHSO)).
- Written procedures shall include descriptions or detailed list of the technical requirements noted on the permit (e.g., housekeeping requirements, limited work space, conductive material, conductive work apparel, or interlock considerations). Procedures will outline the steps necessary to complete the work safely along with any special precautionary "NOTES" or "WARNINGS". The written procedures shall be reviewed in the job briefing and attached to the permit.

PART III:

- The permit is approved by a Supervisor and Sr. Electrician (or qualified designee) before work is allowed to begin.
