

NON-MEDICAL FLUOROSCOPES GENERAL SAFETY GUIDELINES

1. Hand-held fluoroscopes shall not be used.
2. No part of the body may be inserted into the primary beam.
3. The control panel must be equipped with a key lock. Removing the key must not be possible when the key is in the “on” position.
4. A positive pressure switch must be provided to control the exposure, and switch must be located where the operator has a clear view of the radiation equipment.
5. Personnel dosimeters must be worn during operation of the equipment.
6. Any kind of accidental physical injury or radiation exposure must be reported to Radiation Safety Office immediately. Staff should report to Employee Health immediately for evaluation.
7. Any location changes, acquisition of new equipment, disposal or transfer must be approved by the Radiation Safety Office.
8. A copy of Georgia State X-Ray Regulations is available at the Radiation Safety Office.
