

ALTERNATE ENTRY PROCEDURES ATMOSPHERIC TESTING FORM

THIS IS NOT A CONFINED SPACE ENTRY PERMIT

Instructions:

- Complete this form and keep at the entry site for the duration of the entry when Alternate Entry Procedures are used.
- Use continuous forced air (positive) ventilation while entrants are in the space.
- Continuously monitor for atmospheric hazards and record the results every thirty (30) minutes to ensure continuous forced air ventilation is effective.
- If a hazardous atmosphere is detected, **immediately** exit the space and contact EHSO.
- Forward completed forms to your supervisor to be retained for one (1) year.

Entry Requirements <i>If the answer to any of the following questions is "No", Alternate Entry Procedures cannot be used and entry must be performed under Permit-Required Confined Space Requirements.</i>						Yes	No	Comments		
The ONLY hazard posed by the permit space is an actual or potential hazardous atmosphere and no other physical hazards will be introduced.										
A ventilation blower in good working condition has been set up to provide continuous forced air ventilation of the space while it is occupied.										
In the event the ventilation system stops working, entrants can exit the space safely.										
The air supply for the forced air ventilation is from a clean source that does not increase the atmospheric hazards in the space.
