

# CONTAMINATED Glove Removal

1

Pinch and pull cuff of glove. Scoop with finger.

2

Form beak, pulling glove inside out over all fingers and thumb.

3

Pinch opposite glove with beaked hand.

4

Pull glove off.

5

With ungloved hand, slide finger down inside of glove and remove glove.

6

Dispose of removed gloves into appropriate waste receptacle.  
**IMPORTANT: If blood is visible in body fluids, gloves must be discarded into biohazard bag.**

7

Wash hands with soap and running water.  
**IMPORTANT: Do not touch your face before washing hands!**
